

I.T. HEALTH-CHECK FOR YOUR BUSINESS

Over time IT systems become less effective and can lag behind technological advances. This can impact on your business, its levels of efficiency, retaining existing customers or indeed attracting new ones. Via has demonstrated considerable experience in reviewing IT systems, researching technologies, matching business requirements and needs with 'best of breed' in the market and working with varying budgets.

Via can deliver a comprehensive health-check for you, covering:

SPECIALIST ADVICE – FOCUSED & AFFORDABLE

An IT health-check gives a business an opportunity to get specialist advice, in a focused manner, independent of vendors and suppliers. It's totally unbiased. Typically, a health-check will take from 3-5 days. A detailed report is produced for your business, identifying improvements, business opportunities, and an insight into what's working - and what's not. It identifies what can be done to improve the effectiveness of your existing systems and what alternative options are available to you.

TAILORED TO YOUR BUSINESS NEEDS AND YOUR PRIORITIES

The IT health-check can be tailored to suit your needs and your business priorities. Via will look at benchmarking against the competition and your industry. You choose, we deliver.

CALL US NOW FOR AN EXPLORATORY SESSION.

As well as an IT health-check, Via can also provide you with:

- Feasibility analysis of new technologies
- Organization of IT resources
- IT value analysis, and
- A focused review of a selected area of your business.

Via can be your Expert Technology Business Provider assisting you with your future direction

BENCHMARK CONSULTANCY

Read what one of our customers has to say about his project:

*"Via Consulting was engaged by us on a benchmarking consultancy assignment. They provided **excellent analysis and insights** to our company, especially in the area of exploiting technology to business advantage. They have a **no-nonsense approach** and offer first-rate consultancy based on real experience."*
